WebStorm run JavaScript file in terminal I just switched from PhpStorm to WebStorm. When I was using PhpStorm I was used to clicking File->Run File->php: run file and it would launch PHP in the browser. Now, clicking File->Run File gives me this: I'd really like to be able to click run file and run the JavaScript, is there any way to do that? I've already tried doing this setting: (default) but it still prompts me to choose a file to run. I just don't want that. I just want to run JavaScript. A: You may use the External Web Server option instead. In the File>Settings>WebServer settings dialog, click the External Web Server button, enter a command to execute there in the Command textbox and hit OK. Immunostimulation by *Bacteriodes fragilis*. The immunostimulant properties of *Bacteriodes fragilis*, a commensal bacterium of the human intestine, were investigated. *B. fragilis* cells given by intraperitoneal or oral administration, in a low dose range, significantly elevated the mitogenic response of the lymph node cells and spleen cells from mice to mitogens such as concanavalin A (Con A). *B. fragilis* cells given orally, in a high dose range, were also shown to stimulate the generation of suppressor cells. The response of such suppressor cells to the antigen is enhanced in the presence of *B. fragilis* cells in culture. When tested with T cells from a high responder strain, *B. fragilis* cells were able to enhance the effector T cells to perform a cytotoxic reaction against allogeneic targets and, in a specific, antigen-driven manner. *B. fragilis* appeared to act as an adjuvant in the induction of a response to T cells from a low responder strain. The cells 82157476af
