08-13-2017 Normal 46 Build 64 BIT C++ version of the plugin with usage of c++11 and boost 1.58. You will also be able to benefit from using AVX2 on your card. Description: A plugin which enables to count packets per game server. The number of packets is displayed as number of updates per second.NBA Draft: The Five Best Picks On Thursday, the NBA will open up the 2008-09 season with the first round of the draft. And in the first round, there will be few, if any, surprises as the top-rated prospects have been pegged for most of the season. So to help you sort out this draft, we're going to rank the top-five picks. No. 1: Ricky Rubio, PG, Spain Marc Serota/Getty Images This is a no-brainer. But considering the names ahead of him, Rubio may be a little undervalued. But that is only because he is coming off of an injury and some scouts think that he is a boom or bust type of pick. Rubio is a gifted passer who can be a shooting guard in college or he can move to point guard in the NBA. Scouts are generally pretty split on Rubio's talent level. But to me, he is the best talent in the draft outside of Kevin Durant and the top pick is a great spot for him to land. No. 2: Michael Beasley, PF, Kansas Mike Ehrmann/Getty Images Coming off a breakout sophomore season, Beasley has a real shot to be the first overall pick if he comes out of the draft with top-10 potential. Beasley plays with a nasty edge and can score in a variety of ways. And that's not his only strong suit. He is also extremely mobile and can handle 82157476af
